

S-292 Online Canadian Forest Fire Behaviour (FBP) System (CIFFC)

Overview/Description

The Canadian Forest Fire Behaviour Prediction (FBP) System course provides a systematic method for assessing fire behaviour. During this course, students will learn how to fuel, weather and topographic factors influence fire behaviour. By gaining an enhanced understanding of the inputs that make up the FBP system, individuals will have a better grasp on predicting wildfire behaviour.

Target Audience

Forestry Division employees involved in the effective and efficient management of wildfires, from initial attack crews to upper management.

Prerequisites

- S-290 Principles of Fire Behaviour (CIFFC)
- S-291 Understanding the Fire Weather Index (FWI) System (CIFFC).

Registration

Forestry Division employees can register following instructions on the [Forestry Division Training SharePoint](#).
