Alberta Snapshot

Stantec, a global design and engineering firm headquartered in Edmonton, Alberta, has over 250 locations throughout the United States, including four in Indiana. With two offices in Indianapolis and two offices in Walkerton, Stantec is contributing to the state's economy through job creation and sustainable infrastructure development.

For The Paddocks, an affordable housing development in Culver, Stantec's Walkerton team designed a series of green infrastructure features that manage stormwater, provide cooling shade, and add outdoor amenities to the site. Following the success of this project, the developer has asked Stantec to provide landscape infrastructure services for two additional developments.

For more than 25 years, Stantec's Native Plant Nursery in Walkerton has provided millions of native plants and seeds for restoration projects. Assisting with large restoration, mitigation, and landscape projects, their native material has been used on thousands of acres of land throughout the Midwest.
