- Beverages: **\$58.7 million**
- Precision instruments: **\$49.6 million**
- Food residue & animal fodder: **\$44.1 million**

Minnesota exports to Alberta

\*Data from 2023

### Alberta Snapshot

Stantec, a global design and engineering firm headquartered in Edmonton, Alberta, has a significant presence in Minnesota. With six offices in Duluth, Minneapolis, Plymouth, Rochester, St. Cloud, and Woodbury, Stantec is contributing to the state's economy through job creation and sustainable infrastructure development.

Stantec has deep roots throughout the state, and their collective offices have helped sustain communities and preserve natural resources.

The City of Cold Spring grappled for decades with rising nitrate levels in its tap water. With the help of Stantec, they turned to biological treatment to reduce this chemical salt. The \$6.5 million Cold Spring nitrate reduction plant - Minnesota's first - opened in 2023 and reduces nitrate levels to near zero. The plant was also designed with future expansion in mind and is adaptable to changing regulatory considerations.
