Alberta Snapshot

Stantec, a global design and engineering firm headquartered in Edmonton, Alberta, maintains over 250 offices throughout the United States, including two in West Virginia. With offices in Bridgeport and Charleston, Stantec is contributing to the state's economy through job creation and infrastructure development.

When the West Virginia Division of Highways set out to rehabilitate a series of bridges along I-70 in 2019, they selected Stantec as prime consultant and quality assurance managers. The project included designing 24 bridge rehabilitation plans and two full bridge replacements. With careful coordination between many professionals across multiple companies, the final plan set included about 2,800 plan sheets. The massive project was completed in early 2023, providing a safer, more reliable experience for users of one of the most traveled interstate highways in the nation.
