

If a permit has been issued pursuant to Section 62 of the *Traffic Safety Act* authorizing the movement of over dimension empty log trucks, any and all of the following conditions shall apply in addition to any other conditions specified on the permit.

General Conditions of Permit

This permit allows the movement of empty log bunks point to point in Alberta to maximum overall width of 3.66 metres including bunk support systems such as rings and cables provided:

1. When width exceeds 2.6 metres, the vehicle must be equipped with:
 - (a) fluorescent materials at least 50 millimetres wide, on the 3 exposed sides of the stake of the front and rear bunk on each side of the vehicle. The fluorescent material must extend from the bottom of the bunk stake for a length of 1.5 metres.
 - (b) a set of two- way headache rack lights that extend beyond the width of the bunks, that are lit during darkness.
2. When width exceeds 3.35 metres the vehicle is exempt from [Commercial Vehicle Dimension and Weight Regulation](#) requirement of dimension signs provided the unit has a flashing amber light activated.
3. The total height to the top of the bunk stakes does not exceed 4.8 metres when pole trailer or jeep is not loaded on tractor unit.
4. The total height to the top of the bunk stakes does not exceed 5.1 metres, when a pole trailer or jeep is loaded on the tractor unit.
